Provost's Advisory Council Summary of February 26, 2015 Meeting

- Can Erbil (Cha>>BDCJn ErbThomas Wall Katherine O'Dair John Rakestraw Hagop Toghramadjian David Quigley Patricia DeLeeuw Thomas Chiles J. Joseph Burns Joseph Carroll Jessica Pesce
- 1. The summary of the December 4, 2014 meeting was approbled summary will be sented the President's Office. All summaries are posted on the Provost's Office website; members are encouraged to share the the total colleagues.
- 2. Update on Strategic Planning for the Naturaie6ces

Tom Chiles has been working to promoteresearchon campus. In the 18 months that he has been Vice Provost for Researchand Academic Planning he has increased the resources available to faculty for their researchand scholarship In addition to Research Expense Grants and Research Incentive Grants, two new funding mechanism have been created Ignite Grants and Research Across Departments Grants (RADs). Ignite Grants have two deadlines per year External evaluators review the grant proposals at the first level, followed by a campus committee. This year both grant cycles were very competitive. Reviews from the external evaluators were positive and grants were awarded across chools RADs Grants align with paradigmshifts in science funding, which now encourage faculty to collaborate across departments and schools. The goal of these grants is to fund interdisciplinary and multidisciplinary proposals

The Office of the Vice Provost organizedBoston Colleges first Advancing Research& ScholarshipDay this past December. The goal was to bring faculty from acrosscampus togetherwhile promotingresearchon campusext, and talkeynB@ alumnus Phil Landrigan, headof Mt. Sinai's progamin Public Health. The themeof the coming year vill most likely be big data, a topic growing in national importance If anyoneknows of aculty who might beinterested please let om and hiscolleaguesknow. presidentialscholars. Moreover, private and federal agenciestend to fund multidisciplinary approaches complex problems where there used to be one or a few authors on a scientific paper, there are now many more crossing departments and even institutions. Another current trend is the fusing of departments scientists are completing their postdoctoral work with experience in multiple disciplines. These administration of the fusing of departments. These administration of the fusing of the fus

program to its JD program. Vince Rougeau said there were no current plains, the tfuture, the Law School might consider a joint public policy and law degree.

David Quigley raised the issue **the** four snow days BC has had this ye**thre** highest number since the Blizzard of 1978. He thanked libralinging, and facilitiesstaff for their tireless work in keeping **C** open. He and Mike Lochhead had a difficult decision on the second day of the third storm, where BC had a delayed opening. The campus was clear by the afternoon on the first day, but late that afternoon, he learned that the MBTA rail service would be closed the next day. In collaboration with others, Dadled ided to have a delayed start the next day, as manifaculty and staff would still be able to get to campus and the MBUSA system was operating. Ultimately, the B and C lines would be shut downmicesta? weeks.

David thanked everyone for the way they handled the Motodathursday schedule switch after the second storm. It went very smoothly. He decided to do this after he heard from affectedfaculty that those with Monday classes after 4 pm would not see their classes at all from January 1th2 until February 1th6. Some schools switch Monday schedules like this every semester to accommodate for the numerous holidays; Can **action** Brandeis does this.

A Council member said that the majority of the negative feedback came from graduate students, who were displeased with the message and the messaging ate students that the decision and the messaging implied that BC was an undergrassicate tial campus, despite the 5,000 graduate students living caff npus. In future, it might be useful to direct people to the website in the ARE alert and put a more detailed message there. David Quigley also reminded faculty that they always have the authority to cancel their own classes if there are concerns for student/faculty safety.

After the four snow days, some on campreseived calls from parents asking why the faculty were not making up classes online. The Center for fireg Excellence has been providing services and tips for faculton teaching through disruption, but David also hsopheat departments will discuss means for keeping up intellectual continuity. Greg Kalscheaud that the Board of Chairs in A&S raised a question althout times cheen for closing/opening Before the first blizzard, BC closed at 5 pm, but many classes start at 4:30 pm.

A Council member said that parking was difficult after the storms, especially on the delayed opening day.
